PROFESSIONAL SUMMARY

Results-driven software engineer with strong foundation in distributed systems, high-concurrency backend services, and clean architecture. Experienced in designing fault-tolerant microservices, optimizing database throughput, and shipping production code with rigorous test coverage.

ACADEMIC QUALIFICATIONS

Master of Technology in Software Systems — Indian Institute of Technology Bombay *2021 - 2025*

Cumulative Grade Point Average: 9.70/10.0 | Class XII: 92% | Class X: 93%

WORK EXPERIENCE

Full Stack Software Engineer — InMobi Technologies, Bengaluru, India *Jun 2024 - Present*

- Architected high-throughput payment webhook processor using Go and Redis Streams, handling 14,000 requests/sec with p99 latency under 28ms.
- Developed responsive internal operations dashboard in React and TypeScript with TanStack Query, accelerating merchant dispute resolution by 40%.
- Implemented automated circuit-breaker pattern with Resilience4j across 8 downstream microservices, preventing cascade outages during third-party gateway downtime.

TECHNICAL PROJECTS

Peer-to-Peer File Transfer Protocol with NAT Traversal | Technologies: Rust, STUN/TURN, UDP, Tokio, Cryptography

- Developed user-space P2P file synchronization tool implementing UDP hole-punching and ICE protocol to bypass restrictive symmetric NATs.
- Utilized ChaCha20-Poly1305 authenticated encryption to guarantee confidentiality and packet integrity over public Wi-Fi networks.
- Achieved wire-speed throughput of 940 Mbps over local gigabit connections using zero-copy memory-mapped file buffers.

High-Concurrency Real-Time Collaboration Canvas | Technologies: TypeScript, WebSocket, CRDT, React, Node.js

- Built multi-user collaborative workspace using Conflict-free Replicated Data Types (CRDTs) to ensure convergence across disconnected edits.
- Engineered WebSocket server in Node.js with delta-compression protocol, reducing network bandwidth consumption by 64% during intense cursor movements.
- Authored comprehensive property-based test suite with fast-check verifying eventual consistency across simulated random network partitions.

TECHNICAL SKILLS

Languages: Go, Java, Python, TypeScript, C++, SQL

Frameworks & Systems: Spring Boot, Node.js, FastAPI, React, Next.js, gRPC

Databases & Storage: PostgreSQL, Redis, MongoDB, Apache Kafka, Elasticsearch

Cloud & DevOps: Docker, Kubernetes, AWS (EC2, S3, RDS), Git, CI/CD Pipelines

ACHIEVEMENTS & HONORS

- Secured All India Rank 899 in JEE Advanced out of 250,000 candidates.
- Global Rank 191 out of 18,000+ participants in LeetCode Weekly Contest.
- Winner of National Smart India Hackathon (Ministry of Education) in Software Edition.

POSITIONS OF RESPONSIBILITY

- Lead Coordinator, Departmental Technical Symposium (orchestrated coding marathons for 1,200+ students).
- Peer Mentor, Data Structures and Algorithms Laboratory (guided 60+ junior undergraduates).

DECLARATION

I hereby declare that all the information furnished above is authentic and true to the best of my knowledge.
