PROFESSIONAL SUMMARY

Results-driven software engineer with strong foundation in distributed systems, high-concurrency backend services, and clean architecture. Experienced i

EDUCATION

Master of Technology in Software Systems — Vellore Institute of Technology *2020 - 2024*

Cumulative Grade Point Average: 9.00/10.0

WORK EXPERIENCE

Software Engineer - Core Services — Swiggy (Bundl Technologies), Bengaluru, India *Jun 2023 - Present*

- Developed responsive internal operations dashboard in React and TypeScript with TanStack Query, accelerating merchant dispute resolution by 40%.
- Engineered distributed idempotency layer with Redis and PostgreSQL, eliminating 100% of double-debit anomalies during peak flash sales.
- Designed real-time event pipeline consuming 5M daily telemetry records via Apache Kafka, providing sub-second fraud detection alerts.

TECHNICAL PROJECTS

Autonomous Code Review Linter & Security Auditor | Technologies: Python, AST, Tree-sitter, Docker, FastAPI

- Engineered static analysis pipeline parsing abstract syntax trees (ASTs) to detect SQL injection, unvalidated deserialization, and memory leaks.
- Built automated GitHub Action integration running checks across 200+ pull requests with an average scan duration under 3.5 seconds.
- Containerized execution sandbox using gVisor and Docker to securely isolate untrusted student code submissions.

High-Concurrency Real-Time Collaboration Canvas | Technologies: TypeScript, WebSocket, CRDT, React, Node.js

- Built multi-user collaborative workspace using Conflict-free Replicated Data Types (CRDTs) to ensure convergence across disconnected edits.
- Engineered WebSocket server in Node.js with delta-compression protocol, reducing network bandwidth consumption by 64% during intense cursor mo
- Authored comprehensive property-based test suite with fast-check verifying eventual consistency across simulated random network partitions.

TECHNICAL SKILLS

Languages: Go, Java, Python, TypeScript, C++, SQL

Frameworks & Systems: Spring Boot, Node.js, FastAPI, React, Next.js, gRPC

Databases & Storage: PostgreSQL, Redis, MongoDB, Apache Kafka, Elasticsearch

Cloud & DevOps: Docker, Kubernetes, AWS (EC2, S3, RDS), Git, CI/CD Pipelines
